

AFTER SUN

With Shea Butter and Aloe Vera

It has Shea Butter, Beeswax, Chamomile, Avocado and Almond oils, ideal for the skin protection. Its composition provides properties that refresh and relieve after the sun exposure. It successfully combats the solar erythema.

ACTIVE INGREDIENTS AND QUALITIES

Aloe Vera has healing qualities in the treatment of burns produced by excess of UV radiation, as it accelerates the healing process. Aloe Vera also has emollient, hydrant, wetting, regenerative, anti-inflammatory qualities, etc.

The **Chamomile extract** has a calming effect on the nerve endings which are found in the skin, being ideal to keep the skin reduced from inflammation and decongested, getting therefore to relieve and calm the skin. It also helps to hydrate the skin and to keep an optimum level of humidity.

The **sunflower oil** has **vitamin E** that works as an antioxidant to protect the skin from the damage caused by free radicals. It also works as an emollient that can hydrate dry the skin through the formation of an occlusive layer that keeps the humidity of the skin.

The **Allantoin** favours the natural regeneration of the skin and it works as a soft anaesthetic, reducing the sensation of pain.

The **Almond oil** has essential nutrients that will provide you elasticity and hydration, apart from an anti-inflammatory effect.

The **Avocado oil** with its Omega 3 fatty acids and the Vitamins A, D, E and K make it a great ally for the skin care. The antioxidant properties (provided by the vitamins K and E) contribute to regenerate and rejuvenate the skin.

The **Shea Butter** has vitamins A, D, E and F and anti-inflammatory properties that help to relieve the pain. It also has regenerative and restorative capacity of the dermis thanks to its restructuring and softening qualities. It has a powerful and long-lasting effect that it will improve the elasticity of the skin due to its content in Vitamin F.

It has natural **Vitamin E** that apart from helping with the regeneration and healing of the damaged skin tissues, it also works as filter of the solar rays.

Therefore, the Exialoe after sun has excellent properties that refresh and relieve the skin after sun exposure, successfully combating the solar erythema.

MODE OF USE:

Apply it with a soft massage all over the body till its full absorption through the skin.

Repeat the dose on those areas that are more burned or red for the sun to calm and regenerate your skin. You will feel an instant relieve!

200 ml bottle (ref. 1310)
