

# BODY CREAM

With Aloe Vera

The Exialoe Body Cream is the result of years of investigation, using for its formulation the latest available technologies.

As it has a **15% of Aloe Vera** and natural beeswax, among other components, it turns into a **regenerative, hydrant and nourishing** cream for the **whole body**.

It is a cream that can use all types of persons and ages, as it has an anti-inflammatory, calming and regenerative effect.

Its studied and soft Jazmin scent provides a feeling of freshness and pleasance, leaving the skin silky and soft but without greasing it.

## ACTIVE INGREDIENTS

**Aloe Vera:** It provides emollient qualities that soften dry or damaged areas by the external agents and regenerate the dermis. The result? A soft and terse skin.

**Beeswax:** It forms a film on the skin giving consistency and protection to it against the action of the external agents that may damage it. It also keeps the hydration of the dermis, so it does not evaporate.

**Almond Oil:** It intensely nourishes dry skin which softens it and improves the elasticity of the dermis.

## IDEAL FOR:

- Swellings in children and adults, chilblains and stretch marks in hands and feet.
- Ulcers and external varicose veins, wounds, scratches, eczemas, psoriasis, haemorrhoids, swollen legs, and feet.
- Quick relieve of solar burns, rosacea, dermatitis, eczema, psoriasis, and damaged skin.
- After waxing and shaving.
- Hydrating and regenerating the skin of any part of the body

## MODE OF USE:

Apply on the body with a soft massage.

Especially recommended after the bath or a long sun exposure.

Tin of 200 ml (ref.1160)

## Did you know that...?

Over time the levels of natural lipids of our skin decrease and make us to have a skin with less volume and density.

Beeswax is a hydrophobic ingredient that retains the water inside the skin and by covering it with a protective film it becomes with more volume and firmness.
