

CUMINALOE

With Curcuma and Aloe Vera

Cuminaloe is made of Curcuma capsules which has a powerful antioxidant action that helps to protect cell DNA from the damage caused by free radicals, it also prevents from lipid peroxidation that is the process that can result in the appearance of hepatic, kidney, cardiovascular and neurodegenerative disorders as well as diabetes and cataracts.

USES AND PROPERTIES

- Científic studies show that it has a powerful **anti-inflammatory action** by supressing the liberation of inflammatory mediators and stimulating the cortisone production.
- It also has **anti-tumour properties**, which help to inhibit both the proliferation of tumour cells and the transformation of normal cells into cancerous ones inducing its auto-destruction and slowing down the growth of blood vessels that feed tumours.
- It is **hepatoprotective** avoiding the increase of GOT and GPT enzymes, it works as a **digestive tonic**, with choleric and cholagogue activity, helping to avoid dyspepsia and other digestive problems.
- At a cardiovascular level, it improves **blood flow, prevents the formation of thrombus, it has a hypotensive effect and decreases triglyceride and cholesterol levels.**
- It works as an **anxyolitic and anti-depressant** thanks to its light MAO effect and by favouring the increase of Serotonin. It is an excellent regenerating and neuron protector and it also improves its activity by increasing the brain neurotransmitter levels such as the Taurine.
- It strengthens the **immune system** through the cytokines, lymphocytes T, Ukonan polysaccharides, limonene, zinc and copper.
- It also has black pepper to increase its bioavailability and Aloe Vera juice which reinforces its action by having more than 250 active ingredients and a 10% in polysaccharides which make it a powerful regulator, depurative and toning of our organism.

MODE OF USE

Take 1 capsule a day after one of the main meals or as to professional indication.

Package with 60 capsules (ref.2088)
