

NATUR JUNIOR + ELIXIR TOOTHGEL

With Aloe Vera

Our **NATUR JUNIOR DENTAL GEL** provides a complete oral hygiene, avoiding the formation of dental plaque as well as other related disorders.

It also neutralises bad breath and disinfects oral cavity.

Due to its active mixture of flavouring, refreshing and disinfectant ingredients, it leaves a good taste and fresh in the mouth.

As it has **Stevia**, it does not allow bacteria to proliferate, giving a pleasant taste for the children's use.

It has **20% of Aloe Vera**.

Suitable for sensitive gums. Free from fluoride, sulphates, and parabens. Gluten free.

ACTIVE INGREDIENTS

Aloe Vera: It is essential to keep a right oral hygiene, contributing to calm any discomfort or pain that we may feel due to its **antiviral and anti-inflammatory** qualities. This way we can prevent disorders of the mouth and gums as well as **stomatitis**, gingivitis, and **periodontitis**. Different studies also show its effectivity against germs of the mouth, eliminating bacteria that cause diseases such as cavity.

Sea Water: It is greatly beneficial and contributes to a good oral health. It positively intervenes in inflammatory processes of the gums, it **prevents cavity and bad breath**, it disinfects, **calms the pain**, and accelerates the healing of extractions and wounds. Besides, it effectively works in the care of gingivitis and periodontitis and the best without side effects such as the alteration of taste or dental pigmentation.

Propolis: Used nowadays in a great variety of disorders such as oral ulcers, septic facial injuries, gingivitis, periodontitis and alveolites, helping also with the process of **repairing and healing** the collagen fibres and fibroblasts, reason why it constitutes a mixture of great effectivity in the elimination of the oral microbial flora.

It also avoids the formation of dental plaque and helps to eliminate the thrush and the dental abscesses in children.

MODE OF USE:

1. Softly brush the tooth from back to front with short movements.
2. Do it three times a day after meals during at least 2-3 min. or according with the indications of the dentist.

This toothgel cleans and refreshes in a healthy way thanks to the action of its natural ingredients. It does not contain sulphates therefore the foam that it generates it is not abundant.

It is a daily use toothgel. Recommended for adults and children. Children younger than 6 years old: use the quantity of a pea under the supervision of an adult.

Enjoy a healthy smile!

40 ml bottle (ref.1815)
