

## ANTIDANDRUFF TREATMENT

### With Aloe Vera

Numerous statistics have shown that many of the cases of baldness have been produced by pityriasis (dry or greasy dandruffs) as this avoids the normal oxygenation and nourishment of the hair by obstructing the hair follicles, provoking the weakening of it, and favouring its fall.

Our work of years of investigation have taken us to the creation of a product which, when regularly applied, it eliminates the formation of dandruff, helping with the oxygenation of the scalp and preventing therefore, the hair loss. The results are really surprising as its effect is clearly visible from the second application.

It also helps in cases of psoriasis, itchiness, eczemas, or capillary disorders as it contributes with the oxygenation, regeneration, and balance of the scalp.

### ACTIVE INGREDIENTS

**Pirectone olamina:** It controls the excessive production of cells at the same time that exercises an antibacterial, anti-inflammatory and antimycotic activity on the germs causes of different pathologies of the scalp. It is ideal for greasy hair as it helps to balance the production of sebum in the scalp. It is used to treat seborrheic dermatitis and the flaking of the skin.

**Hydroxypyridinone:** Antimycotic that works on the germs that produce an excess of grease and dandruff.

**Barbadensis Aloe:** It has emollient, hydrant, wetting, epithelizing, anti-inflammatory, healing qualities and specially to improve blood flow providing more oxygenation to the hair follicles.

### MODE OF USE:

Wash your hair and apply the antidandruff shampoo massaging for 2 or 3 minutes. Repeat if it is necessary and after rinsing your hair with abundant water, towel dry pressing the area. Finish by applying the antidandruff lotion and leave it working without rinsing it. If after some time you feel that your scalp is balanced, you can alternate the antidandruff shampoo with the shampoo with cosmetic effect.

Provided the special characteristics of the lotion, after its application you can do any type of hair style as it does not leave wastes and provides volume to the hair.

Shampoo - Bottle of 100 ml (ref. 1031)  
Lotion - Bottle of 50 ml (ref. 1032)
